Feedback for Your Instructor

(Please note: written comments provided on this page are for your **instructor only**)

Your comments will be returned to the Faculty Member within three weeks after the submission of the course grades to the Registrar's Office.

1. Indicate what you found beneficial regarding the instructor's teaching.

I really enjoyed the way that Diane provided us with class resources through google docs so that we can have access to these resources moving forward. Diane also provided us with a great opportunity to teach/and/or observe the teaching of a student with an intellectual disability.

2. Indicate what you think the instructor could have done differently to assist you in your learning.

At times I felt a bit confused about where certain documents were. However, Diane responded very well to our feedback and created a large document with everything in it which really helped.

3. Other comments.

Thanks for a great course Diane!
Best of luck with the rest of your PhD!

1. Indicate what you found beneficial regarding the instructor's teaching.

The assignments were extremely relevant and practical, and I really appreciated that. Learner profiles and classroom profiles are a tremendously beneficial tools. I also appreciated the focus on UDL as it is an area many educators are unfamiliar with.

2. Indicate what you think the instructor could have done differently to assist you in your learning.

My only feedback here would be to reduce the pace just a little - it was, at times, just a little hard to keep up for those of us who process a little more slowly.

3. Other comments.

Clarifying exact due dates on course syllabus is helpful, again for those of us who a bit more visual + concrete.

- Been more organized. Course materials were located in several areas & made it hard to find
- Also, assignment requirements were not laid out clearly & changed during the assignment timeline.

3. Other comments.

- didn't want to include examples of work in ~~visual~~ visual until asked which is weird in an inclusion class.
